DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kalley (306)/(000) in view of DE 19938480 A, Ciana (612), and Pinkus (213); as applied in the office action rejection, dated 10/1/02.

In the amendment of 12-30-02, applicant argues that his light-emitting diodes has a current of less than one ampere, based on the disclosure on page 6, lines 17-19.

In response to said amendment, the examiner notes that this particular passage in applicant's disclosure is listed under the heading of "DISCRIPTION OF THE RELATED ART". Said passage provides a general discussion of the benefits LEDs, as compared to say an incandescent bulb. In fact the summary of the invention, as well as, the specification and/or original claims were silent with regard to the particulars of said current, to applicant's diodes/LEDs. Hence, applicant is simply restating well known properties of said diodes and is considered an inherent property of such when utilized.
